

White Dutch Clover

Trifolium repens

White Dutch Clover is a low growing clover that grows well in cool, moist, and fertile locations. It has a shallow root system and spreads by stolons or runners across the top of the ground. It can be used in lawns, as a ground cover, cover crop, for erosion control, and in pasture mixtures. It can provide natural nitrogen with the ability to fix nitrogen from the air and bring it into the soil.

Seeding Rate: Drilled: 4-6 Lbs. / Ac | Broadcast: 1 Lb. / 4,000 sq ft

Height Range (inches): 1 - 6

Seeds Per Pound: 800,000

Taxonomy

Species: repens

Genus: Trifolium

Family: Fabaceae

Order: Fabales

Subclass: Rosidae

Class: Magnoliopsida

Division: Magnoliophyta

Subkingdom: Tracheobionta

Kingdom: Plantae
